

Industrial Hemp Fit For Commerce Certificate

October 19, 2022

RIPPLED LEAF FARMS LLC

License Number: 20211129

Business Email: rippledleafarms@gmail.com

This certificate concerns the test result for the industrial hemp plant sample collected at the licensed grow location indicated below by the sample number. The sample was collected by an MDA inspector on **10/5/2022**. As defined in Minnesota Statute 18K.02 and Subtitle G of the Agricultural Marketing Act of 1946, 7 U.S.C. §§ 1639o – 1639s (2018 “Farm Bill”), the delta-9 tetrahydrocannabinol post-decarboxylation (Total Potential THC) content is specified by a range of values plus or minus the measurement of uncertainty (MU). The MU is based on the laboratory measurement of uncertainty. The value 0.30% must lie within the THC content range for your sample, which is listed below. Grow location information: **8071 N Savanna Road, Floodwood, MN 55736**.

Sample Number	Grow Location	Variety Name	Total Potential THC (Lower Value w/ MU- Upper Value w/ MU)
NG22028	3151	Super Sour Space Candy	0.3180% (0.24052-0.39498)

The sample taken at your hemp grow location was tested for THC concentration and found to be in compliance with MS Chapter 18K.02 and Subtitle G of the Agricultural Marketing Act of 1946, 7 U.S.C. §§ 1639o – 1639s. The industrial hemp material harvested from this specified lot is fit to enter the stream of commerce.
